HEALTH RULES FOR SWINE

1. **Certificate of Veterinary Inspection (CVI):** All swine must be accompanied by a Certificate of Veterinary Inspection signed and dated by an accredited veterinarian with an inspection date on or after September 21, 2022. No animal showing signs of infectious, contagious, or external parasitic disease will be allowed into the Pennsylvania Farm Show Complex & Expo Center. However, exhibitors who observe an animal that may present a health hazard to other animals are asked to report the stall location to the show committee. The official show veterinarian, in consultation with Show Management, shall be responsible for determining the health status of all animals. Animals showing evidence of infectious, contagious, or external parasitic diseases shall be removed by their owner from the show grounds at the direction of Show Management.
2. **Vesicular Stomatitis (VS) Statement:** This applies to states that experienced a VS outbreak in the last 12 months. In these cases an accredited veterinarian shall determine whether the animals are free from VS, and animals shall be accompanied by a CVI with the following statement signed by the accredited veterinarian: "All animals identified on this CVI have been examined and found to be free from VS. During the past 90 days, these animals were not located within 10 miles of a site where VS has been diagnosed."
3. **Swine Identification Requirements:** All swine must be identified with an RFID ISO-compliant, 15-digit 840 ear tag.
4. **Brucellosis and Pseudorabies Testing Requirements for Out-of-State and Pennsylvania Breeding Swine:**
 - (a). **Brucellosis:** No brucellosis test is required if the animal originates from a validated brucellosis-free herd. If from a validated herd, the herd number and date of last test must be included on the CVI. If not originating from a validated herd, out-of-state swine must be negative to an official brucellosis test within the 30 days prior to the date of importation, and the negative results and date of test must be included on the CVI or the animal must be accompanied by a negative laboratory test report (a copy of the original lab report is acceptable).
 - (b). **Pseudorabies:** No pseudorabies test is required if the animal originates from a qualified pseudorabies-negative herd. A qualified pseudorabies-negative herd shall not be construed to mean every swine herd from a Stage V state, but only those herds in compliance with individual herd testing plans. If from a qualified herd, the herd number and date of last test must be included on the CVI. If not originating from a qualified herd, out-of-state swine must be negative to an official pseudorabies test within the 30 days prior to the date of importation, and the negative results and date of test must be included on the CVI or the animal must be accompanied by a negative laboratory test report (a copy of the original lab report is acceptable).
5. **Brucellosis and Pseudorabies Testing Requirements for Market Swine:**
 - (a). **Brucellosis:** No brucellosis test is required for market swine sold for immediate slaughter.
 - (b). **Pseudorabies:** No pseudorabies test is required for market swine sold for immediate slaughter.

BREEDING SWINE

❑ BRUCELLOSIS REQUIREMENTS

No brucellosis test is required if the animal originates from a validated brucellosis-free herd.

If from a validated herd, the herd number and date of last test must be included on the CVI.

If not originating from a validated herd, out of state swine must be negative to an official brucellosis test within the 30 days prior to the date of importation, and the negative results and date of test must be included on the CVI or the animal must be accompanied by a negative laboratory test report (a copy of the original lab report is acceptable).

- ❑ **Vesicular Stomatitis (VS) Statement:** This applies to states that experienced a VS outbreak in the last 12 months. In these cases an accredited veterinarian shall determine whether the animals are free from VS, and animals shall be accompanied by a CVI with the following statement signed by the accredited veterinarian: "All animals identified on this CVI have been examined and found to be free from VS. During the past 90 days, these animals were not located within 10 miles of a site where VS has been diagnosed."

❑ PSEUDORABIES REQUIREMENTS

No pseudorabies test is required if the animal originates from a qualified pseudorabies-negative herd. A qualified pseudorabies-negative herd shall not be construed to mean every

swine herd from a Stage V state, but only those herds in compliance with individual herd testing plans. If from a qualified herd, the herd number and date of last test must be included on the CVI. If not originating from a qualified herd, out of state swine must be negative to an official pseudorabies test within the 30 days prior to the date of importation, and the negative results and date of test must be included on the CVI or the animal must be accompanied by a negative laboratory test report (a copy of the original lab report is acceptable).

MARKET SWINE

❑ **Brucellosis and Pseudorabies Testing Requirements for Market Swine:**

- (a). **Brucellosis:** No brucellosis test is required for market swine sold for immediate slaughter.
- (b). **Pseudorabies:** No pseudorabies test is required for market swine sold for immediate slaughter.
